

Product Specifications

Brand : Klinion® Woundcare

Product : Kliniderm® Super Fiber

Product description

Kliniderm® Super Fiber dressings are single use, sterile nonwoven wound dressings, composed of 100% sodium carboxymethylcellulose fibers. This conformable and highly absorbent dressing absorbs wound exudate and transforms into a cohesive transparent gel, maintaining a moist environment to support the wound healing process and minimizing pain and discomfort to the patient during dressing changes or when the dressing is in situ. It absorbs and retains exudate to lock away harmful components contained within the wound exudate, such as bacteria and proteinases, reducing the risk of wound infection and maceration.

Intended use

Kliniderm® Super Fiber dressings are indicated for the management of moderate to heavily exuding chronic and acute wounds which have breached the epidermis or dermis. The dressings may be used throughout the healing process on the following wounds:

- Leg ulcers
- Pressure ulcers (stage II-IV)
- Diabetic ulcers
- Donor sites
- Post-operative wounds
- Surgical wounds left to heal by secondary intent
- Partial thickness burns
- Abrasions
- Lacerations

Classification

Class IIb under Regulation (EU) 2017/745 on Medical Devices, Annex IX Chapters I and III (Class IIa and Class IIb Devices).

Features

- Helps to minimize the risk of pain and damage to the wound at dressing changes.
- Absorbs and retains exudate to lock away harmful components, such as bacteria and proteinases
- Comfortable for the patient.
- Supports moist wound healing.
- 100% sodium carboxymethylcellulose fibers
- Single use up to 7 days wear time.
- No stitches, allowing optimal contact with the wound bed.

Product Specifications

Precautions

- In case of signs of infection, consult a healthcare professional for adequate infection treatment.
- Do not use on patients with a known sensitivity to the dressing or its components.
- Sterile if pouch and seal are intact. Do not use if damaged.
- Do not re-use. Re-use can cause serious infections.
- Do not re-sterilize.
- For external use only.
- For use under the guidance of a healthcare professional.

Product components

Kliniderm® Super Fiber dressings consist of 100% sodium carboxymethylcellulose.

Product performance specifications

Characteristics	Value
Free swell absorption	20.95g/100cm ²
Product Base weight (GSM)	≥ 170± 30g/m ²

Presence of specific components

Component	Present
Phthalates	No
Substances of animal origin	No
Substances of human origin	No
Blood or blood derivatives	No
Medicinal substances	No
Heavy metals	No
PVC	No

Sterilization

Gamma sterilized.

Product Specifications

Storage conditions

The products should be stored under ambient conditions, in the original packaging. In a cool, dry and well-ventilated place, non-corrosive gas environment, away from direct sunlight, fire, and flammable materials.

Shelf life

3 years from production date when stored under specified conditions.
