Product description

Bambo Nature disposable swim nappies have a soft, elasticated fit all the way round the waist, giving your baby a super comfortable and flexible experience in the water. The swim nappies are designed for use in water with double leak barriers to keep the water clean and free from accidents. Bambo Nature swim nappies are dermatologically tested and certified in accordance with the Nordic Swan Ecolabel, the EU Flower, Asthma Allergy Nordic, FSC® (Forest Stewardship Council) and OEKO-TEX STANDARD 100.

Specifications

Nordic Swan licence no.	5023 0001
OEKO-TEX licence no.	2209241
Product or testing standards	ISO 14001, ISO 9001
Directives, legislation and regulations	(EU) 2023/988
Safety instructions and warnings	The packaging should be kept out of the reach of children.
Shelf life	5 years
Storage instructions	Store in a dry place at room temperature and away from direct sunlight.
Disposal of the product	Can be disposed of with ordinary household waste, sorted in accordance with local regulations.
Disposal of packaging	Can be recycled or incinerated.

Instructions for use

Put the swim nappy on your child before you go into the water. Most public swimming pools require you to wear swimwear over the nappy for extra protection. When the nappy is soiled, you can easily change it by tearing open the sides. Wash your child and put on a new swim nappy.

The Nordic Swan Ecolabel is an official Scandinavian eco-label. Products bearing the Nordic Swan Ecolabel meet strict environmental requirements regarding raw materials, production, use, documentation and safety.

FSC® (Forest Stewardship Council) is an international non-governmental organisation dedicated to promoting responsible forest management worldwide. FSC®-certified products are made from raw materials sourced from well-managed forests and responsible sources. The label's traceability and integrity are maintained through strict control measures, and when you choose FSC®-certified products, you are helping to protect the forests and the people and animals that live in them. FSC® Mix means that the product consists of a mix of FSC-certified wood and recycled materials. See www.fsc.org for further information.

The EU Flower, also known as the EU Ecolabel, is the official eco-label in Europe. Products bearing the EU Flower meet strict environmental requirements regarding raw materials, production, use, documentation and safety.

Asthma Allergy Nordic is proof that the product is recommended by experts from Asthma-Allergy Nordic. Products bearing this label contain no perfume and pose a minimal risk of causing skin allergies.

Products with the Vegan Society certificate contain no animal-derived ingredients and are not tested on animals.

OEKO-TEX, also known as 'Confidence in Textiles', is a health and environmental label used worldwide. The certification ensures that textiles do not contain substances that are harmful to health or the environment.

The 'Dermatologically Tested' symbol guarantees that the products have been tested for potential skin irritants by an independent third-party laboratory.

Effective leak barriers, both visible and invisible, as well as latex-free elastic bands, ensure a good fit, thereby reducing the risk of leakage.

The product is fully breathable, making it comfortable and gentle on the skin to wear – even over time.

Bags bearing this symbol are made from at least 60% PCR (post-consumer recycled) plastic, i.e. plastic materials that have previously been used by consumers.

In this way, we can reduce our plastic waste and help to protect the environment.
