

# Vital Signs<sup>®</sup> head positioner

View, access and support intubated patients in the prone position with the single-use head positioner

## Support intubated patients in the prone position

Made without DEHP, our lightweight Vital Signs<sup>®</sup> head positioner supports the patient during prone procedures. While the patient is comfortably positioned in the cradle, you can access the tracheal tube and view the patient through the unit openings and mirror. This product does not contain natural rubber latex.
