Your Professional Way to Care

The AmniHook® Amniotic Membrane Perforator

The AmniHook® Amniotic Membrane Perforator provides physicians and midwives with a safe and convenient method of rupturing the amniotic membrane at the first attempt. Each AmniHook® is subjected to a rigorous laser-vision inspection, to ensure that only one instrument will be needed per procedure.

- Rounded tip and protected point designed to rupture the amniotic membrane without injury to mother or foetus
- Disposable, sterile and individually packaged for convenience
- 10" long (26.5cm), with moulded sides and a non-slip grip for more precise control

Stock No.	Description	Unit of Sale
65.00.34	sterile Membrane Perforator	100/box

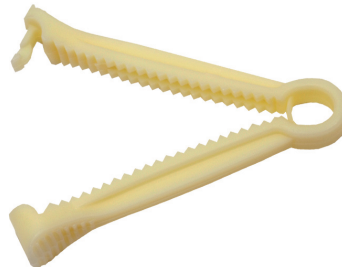

Double-Grip® Umbilical Cord Clamp

An innovative laser-vision inspection system ensures that this precision-engineered cord clamp lives up to its well-earned reputation for excellence. Only clamps which meet our inspection standards 100% will be found in the delivery room.

- Safe, disposable, easy-to-use
- Slipping during use is prevented by means of a non-slip surface on both sides of the clamp
- Maintains a tight seal and exerts constant pressure on any sized cord, even as the cord shrinks
- Hinge-guard confines the cord between serrated jaws to eliminate movement
- No rough edges to snag the clothing of a newborn, or to get caught on bed linen

Stock No.	Description	Unit of Sale
65.00.31	sterile Cord Clamp	125/box
65.00.29	non-sterile Cord Clamp	250/box

Cord Clamp® Clipper

Developed to complement our Double-Grip® Umbilical Cord Clamp, our Cord Clamp® Clipper is specially designed to safely cut through the clamp hinge to remove the clamp from baby.

- Concealed cutting surface eliminates risk of sharp or pointed objects near baby
- Single patient use only, to prevent risk of cross-contamination

Stock No.	Description	Unit of Sale
65.00.32	Single Clipper	1/box

U-Bag® Urine Specimen Collector

The U-Bag® Urine Specimen Collectors are the first choice for convenience, protection, and care for an infant's tender skin. This complete 'system' of urine-collectors offers features which facilitate every infant urine-collection need.

- See-through butterfly patch makes application easy and accurate
- Comfortable for baby, and suitable for use with both males and females
- Construction with a no-flow back valve keeps urine away from the skin to prevent irritation
- Adhesive patch can be folded in half to seal the specimen for sending to the laboratory

U-Bag® with Standard Adhesive Single Specimen Style **sterile**:

Stock No.	Description	Unit of Sale
65.00.07	Newborn (100ml)	100/box
65.00.05	Pediatric (200ml)	100/box

Single Specimen Style **non-sterile**:

Stock No.	Description	Unit of Sale
65.00.04	Newborn (100ml)	100/box
65.00.02	Pediatric (200ml)	100/box

U-Bag® with Porous Cloth Adhesive Single Specimen Style **sterile**:

Stock No.	Description	Unit of Sale
65.00.14	Preemie (10ml)	100/box

PlastiBell® Circumcision Device

A circumcision procedure which requires no special post-operative care or dressing means a significant saving in both time and money. The disposable PlastiBell® Circumcision Device eliminates the need for the repetitive and costly sterilization required for stainless steel clamps. No chance of lost or mis-matched parts that often render other clamps unsafe or unusable.

- Clear, plastic construction provides visual access at all times
- A clean line of excision which helps to promote rapid healing
- No dressings required
- Unique shaped handles for easy size identification
- Sterile, individually packaged

Hospital Assortment Pack:

Stock No.	Description	Unit of Sale
