Many proven choices

Annex I of Directive 93/42/EEC for medical devices states: "If the device is intended for use in combination with other devices or equipment, the whole combination, including the connection system, must be safe and must not impair the specified performances of the devices." Every component in the Medela suction family (pumps, collection systems, and tubing) has been tested in combination with other Medela suction components, and has been proven safe, reliable and fully compliant with the Directive, as part of a Medela-compatible system. Medela offers a variety of components and configurations to choose from, according to your needs:
