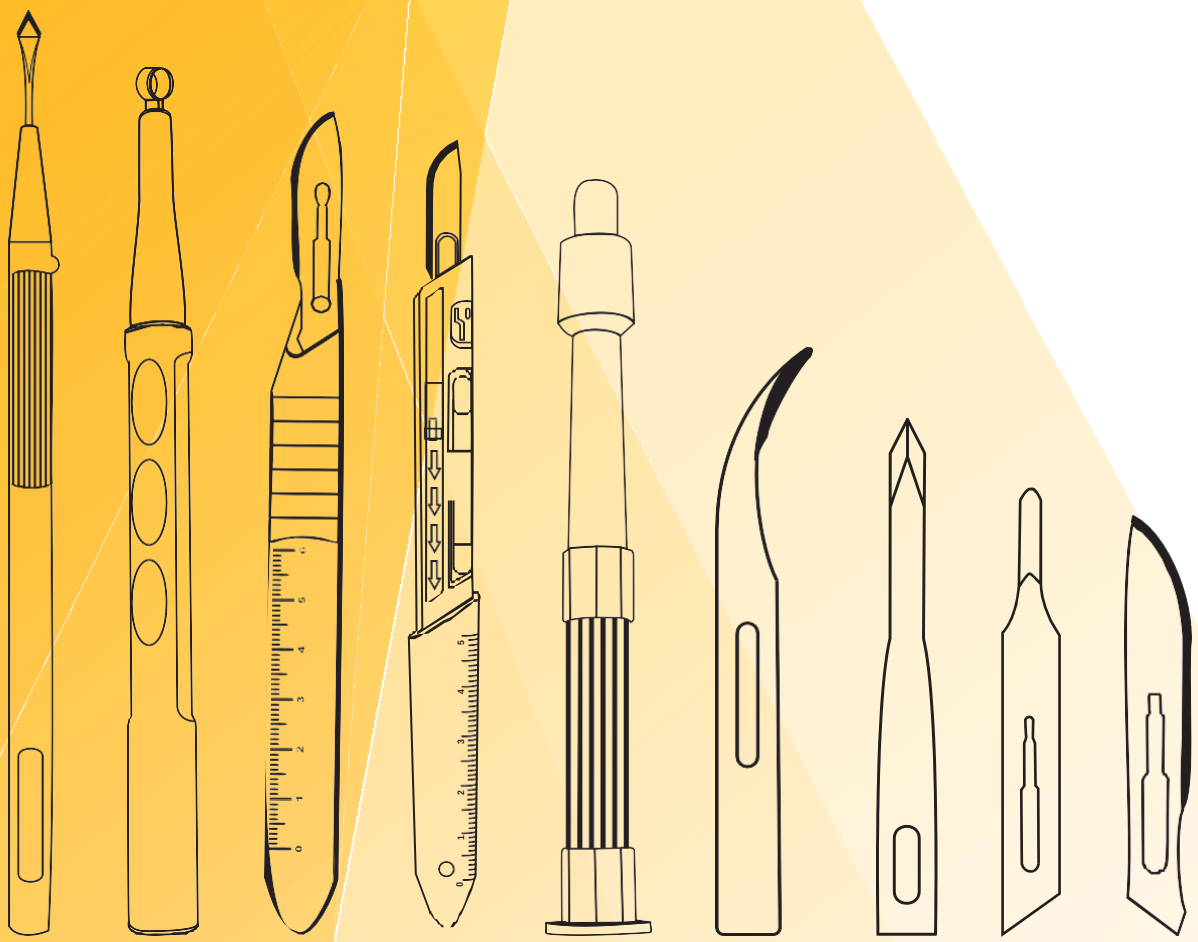
QUEST FOR BETTER HEALTHCARE



The Paramount Philosophy:

With a vision of being a global leader in the medical disposable industry, Paramount Surgimed believes in providing its customers a timely supply of quality products at a competitive price. The company came into existence in 1993 under the Grover Group of companies capitalizing on the rich and diverse experience of over 60 years. Now, the brand is symbolized with trust and quality in the medical industry. The company started with the manufacturing of Surgical Blades and is now a leading supplier of a huge range of disposable products.

Paramount exports to over 97 countries, has 40 distributors and 400 Dealers across India. Our State-of-the-Art production facility compares to any international standard and is accredited with ISO: 13485:2016, CE Certificate and US FDA Device Listing, MD SAP.

The Paramount Vision:

Paramount Surgimed and all its employees share the vision of their dynamic Managing Director, Mr. Shaily Grover to be a global leader in the Medical Industry. Mr. Grover has ensured that the Group's reputation amongst its associates is synonymous with top quality, updated technology, dedicated approach and customer friendliness.

Surgical Blades

Carbon Steel & Stainless Steel

Features

- Stainless Steel Surgical Blades and Carbon Steel Surgical Blades.
- Packed in peel open pouches with a VCI protective inner paper.
- Shelf life of 5 years - Sterile Product
- Stainless Steel (Grade F as per ISO 7153-1:2016)
- Carbon Steel (Grade- As per BS 2982:1992)
- Complies the Hardness requirement of BS 2982:1992 standard.
- Complies the fitment requirement of ISO 7740:1985 standard requirement.

FITMENT 3

FITMENT 4

Post Mortem Blades -Size 60

Features:

- Used in the fields of Pathology and Histopathology for autopsy
- It is used with handle No.8
- Available in both material carbon steel and stainless steel
- Box of 50
- Individual peel pouch

Post Mortem Blades -Size 40

Features:

- The PM40 range of blades are meant to be used with screw type heavy duty handles
- Heavy duty blade
- Box of 10

Stitch Cutters

Stainless Steel & Carbon Steel

Description

Stitch Cutter is used for general suture removal. Appearing similar to a scalpel, this instrument requires no handle and is a simple and convenient, way to remove basic sutures. The slightly curved, flat, bull nose tip slides under the suture and when rotated, gently removes the suture from the site. Long stitch cutter is made of stainless steel and short stitch cutter is made of carbon steel. The mini stitch cutter is made of stainless steel can be used with handle No.3L, 7 & 9. Alternatively, it is also available on pre-mounted ABS disposable plastic handle.

Features

- 5 Year Shelf Life - Sterile Poduct
- Each blade is protected by VCI paper in a peel-open foil sachet.
- Convenience of single-use disposables.
- Sizes clearly marked on each blade.
- Each box contains 100 pcs

Thumb Scalpel

Stainless Steel

Description

Disposable thumb scalpel or pocket scalpel is used in place of a surgical blade. This reduces or even prevents the incidences of injuries that can occur during the process of fitting or removing contaminated blades from handles.

The disposable thumb scalpels have a protective cape/guard for the blade that can be used so the scalpel can be safely disposed in the operation theater/room disposal container.

Safety Scalpel

Stainless Steel blade

Features

- It is a safe alternative to the traditional scalpel and fulfills the requirement to reduce sharp injures.
- Ribbed on both side of the sheath which provide extra gripping for left handed as well as right handed surgeon.
- One-handed activation allowing the surgeon to focus on the surgical site.
- Audible clicks makes the scalpel more secure and protective.
- "Used & Un-Used" indications prevent contamination and transmission of blood borne disease.
- Permanent safety lock prevents accidental cuts.
- Latex Free.
- Measurement scale 0 to 5 cm is embossed on the handle.
- Ergonomically designed safety scalpel.
- ABS plastic handle and sheath gives extra strength to the product.
- Universal size handle that is ideal for kits, trays & packs.

Universal Safety Scalpel

Stainless Steel blade

Features

- Safety Mode: When you retract back after fully extending the blade, it makes a click sound to denote it is in safety mode. Safety mode means that the scalpel is not fully extended. This feature avoids injuries when the blade is half way extended as it retracts back and does not pierce through. It has to be fully extended to use.
- Safety Lock: if you completely retract back it makes a loud click denoting it is in safety lock position. Safety lock position means that the blade cannot be reused once it is in lock position. This feature forces the doctor to dispose the product and minimizes the risk of transmissibility of blood-borne infectious agents.
- Compatible for a left handed as well as right handed surgeon.
- Safety feature in pre use and post use of product.
- One-handed activation allowing the clinician to focus on the surgical site.
- The retractable design protects the blade from exposure, minimizing the risk of accidental cuts.
- Universal size handle that fits all types of hand sizes, and ideal for kits, trays & packs.
- One handle size fits all blade sizes.

Dermal Curette

Stainless Steel blade

Description

The curette has a firm place in the range of dermatological, diagnostic and therapeutic instruments. It is one of the most versatile instruments. For that reason, it is increasingly also used in other disciplines, such as plastic surgery and gynaecology.

The aim of a curette is the removal of a superficial skin changes with minimal damage to the surrounding tissue.

The curette is extremely sharp thus ensuring precise and gentle tissue removal. It can also be used for the treatment of superficial malignant tumours. The outstanding cutting ability makes working with it much easier compared with conventional products.

Supplied sterile and individually packed. Lancet comes in a pack of 200 pieces per box. the tip is specially designed for easy pricking, which minimizes patient trauma.

Details:

Product Name:	Blood Lancet
Product Code:	PSSBL
Size of Inner Box (cm.):	12.5 x 7 x 2.5
Unit/Box:	200
Export carton:	100 Boxes x 200 Units
Export Carton size (cm.):	38.5 x 26.5 x 15.5
Per 20 feet container:	1800 Cartons

Myringotomy Knife Blades

Description

Myringotomy is a surgical procedure of the eardrum or tympanic membrane. The procedure is performed by making a small incision with a myringotomy knife through the layers of tympanic membrane.

Features:

- Optimised micrometre-accurate precision grinding.
- Double edged allowing for cutting movements in both directions.
- Ultra-sharp cutting edges of superb durability.
- Consistently sharp, angled blade facilitates a clean cut.
- Spear tip, Narrow shaft.
- Lance tip, Downward cut, Narrow shaft .
- With and Without Handle

Details:

Product Name:	Myringotomy Knife Blade
Size of Inner Box (cm):	24.2 x 8 x 2.5
Unit/Box:	5 Pcs
Outer Boxes:	--
Export carton:	5 x 10 Boxes
Export Carton size (cm):	50.5 x 42 x 14
Per 20 feet container:	1000 Carton

Terms and conditions

The certificate is subject to the following terms and conditions:

- Any producer (see 2001/95/EC for a precise definition) is liable for damage caused by a defect in his product(s), in accordance with directive 85/374/EEC, as amended, concerning liability of defective products.
- The certificate is only valid for the products and/or manufacturing premises listed above.
- The Manufacturer shall fulfil the obligations arising out of the quality system as approved and uphold it so that it remains adequate and efficient.
- The Manufacturer shall inform Presafe of any intended updating of the quality system and Presafe will assess the changes and decide if the certificate remains valid.
- Periodical audits will be held, in order to verify that the Manufacturer maintains and applies the quality system. Presafe reserves the right, on a spot basis or based on suspicion, to pay unannounced visits.

The following may render this Certificate invalid:

- Changes in the quality system affecting production.
- Periodical audits not held within the allowed time window.

Conformity declaration and marking of product

When meeting with the terms and conditions above, the producer may draw up an EC declaration of conformity and legally affix the CE mark followed by the Notified Body identification number of Presafe.
