

OPHARM[®]

OPHARM was founded in 2020 as a reaction to a significant increase in demand for medical and protective products. The Company rapidly gained new markets and quickly became the industry leader.

Our mission is to deliver the best quality product to our customers. Our products satisfy the most rigorous European norms regarding medical and protective equipment. We are proud to produce all of our products in Europe, from materials also purchased in Europe. All of our raw materials go through a strict quality verification process before being used. Our laboratory checks the quality of each delivery of goods and finished products. For all our products we use both the traditional form of B2B and OEM. **Our goal is to produce the best quality, every time, Made in EU.**
