

60301 Extremity Set, Bilateral Leg

Impermeable and absorbent drapes with elastic apertures

Product details

Product group name : Extremity drapes and sets

Descriptive feature : 3-ply, Patched

Sterile : Sterile

Brand : BARRIER®

Product descriptions

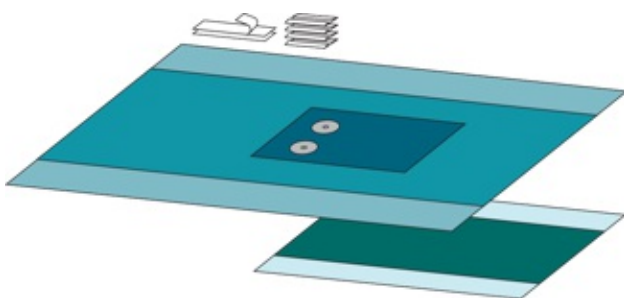

Short description : Impermeable and absorbent drapes with elastic apertures

Long description : BARRIER® extremity drapes with elastic apertures are all impermeable with absorbent top layer and an extra absorbent patch closes to the working area.

The 3-layer drapes feature effective absorption of our Drisite® Plus fluid handling solution combined with strong impermeable material to help maintain a dry working area, minimise risk of microbial transfer, strike-through and unwanted liquids on the OR floor. Drisite Plus has three fluid handling zones: a dry barrier, which is the patched area; a strong barrier, made of a tough, drapeable laminate that moves excess fluid to the third absorbent barrier. Also, integrated adhesive edges secure the fit and minimize the risk of micro-organism being transferred to the wound site.

• Our drapes can be included in Mölnlycke® ProcedurePak® trays to support operating room efficiency.
