

➤ KIMAL GUIDEWIRES: GREATER CONTROL FOR SELDINGER INSERTION

- Grooved thumb wheel for controlled advancement
- Available in sizes from .018" to .035"
- Kink-resistant J-tip nitinol wire
- Clear depth markings on both guidewire and dispenser

KIMAL HAS A SIMPLE SOLUTION TO DROPPED OR DAMAGED GUIDEWIRES...

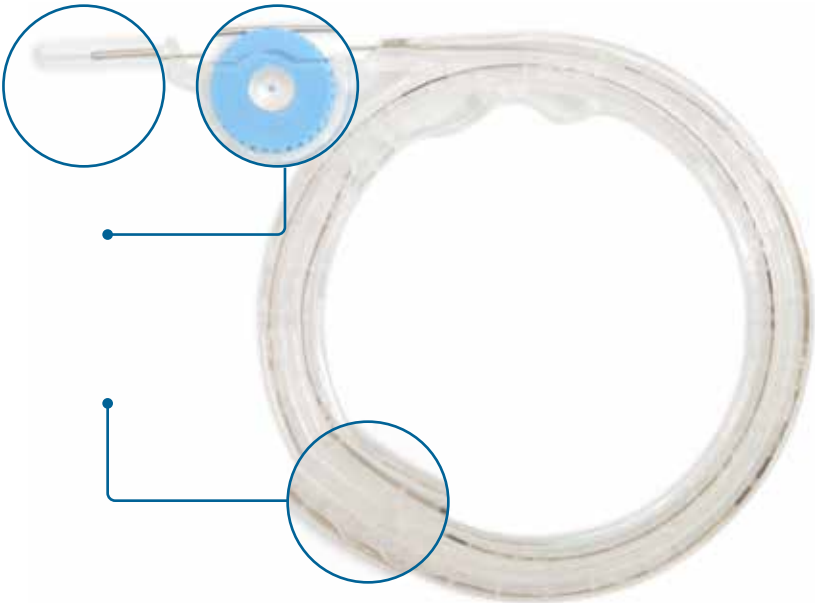

REPLACEMENT GUIDEWIRES

All Kimal guidewires are nitinol to minimise kinking and are preloaded in the thumb wheel dispenser to help obtain vascular access.

The tip of the guidewire dispenser is designed to fit into the Altius® guidewire syringe for CVC placement.

Grooved thumb wheel provides greater control when advancing whilst wearing gloves. The anti-slip groove ensures the guidewire stays centred under your thumb.

Depth markings are indicated both on the guidewire dispenser and the guidewire.

REPLACEMENT GUIDEWIRES (SUPPLIED STERILE) PRODUCT ORDERING DETAILS
